Incident Response Runbook

Acme Robotics -- Internal Policy Document
Effective Date: 2026-01-01

Severity Levels

Sev1: Full outage affecting all customers.
Sev2: Major degradation affecting a significant subset of customers.
Sev3: Minor issue with limited customer impact.
Sev4: Cosmetic issue with no functional impact.

Escalation

A Sev1 incident pages the on-call engineer immediately and notifies the engineering director within 15 minutes of detection. Sev2 incidents page the on-call engineer immediately; director notification is optional based on on-call judgment.

Postmortem Requirement

A written postmortem is required for every Sev1 and Sev2 incident, due within 5 business days of resolution. Sev3 and Sev4 incidents do not require a postmortem unless requested by engineering leadership.

Status Communication

The public status page must be updated within 10 minutes of a confirmed Sev1 or Sev2 incident, and again when the incident is resolved.
